QUANTUM-AI
THE SCHOOL OF DATA AND AI

ANGULAR JS

INDUSTRY-ORIENTED | PROJECT-BASED | CAREER-FOCUSED

Welcome to AngularJS

Learn modern web application development with AngularJS, a powerful framework used for building dynamic and interactive web applications. This course focuses on creating responsive single-page applications using JavaScript, along with HTML and CSS.

Through hands-on projects and real-time examples, students learn data binding, directives, controllers, routing, and application structure. By the end of the course, learners can build scalable, user-friendly web applications and strengthen their front-end development skills.

QUANTUM-AI

WHY QUANTUMAI?

Quantum AI combines advanced computing and artificial intelligence to solve complex problems faster and smarter. We focus on future-ready skills, practical learning, and real-world applications in Data, AI, and emerging technologies. Our industry-oriented training prepares students to lead innovation and build successful careers in tomorrow's technology-driven world.

COURSE OVERVIEW

The PHP Full Stack Development course is designed to build complete web development skills, covering both front-end and back-end technologies. Students learn to design responsive websites using HTML, CSS, and JavaScript, while developing dynamic web applications with PHP and database management using MySQL.

The course emphasizes hands-on projects, real-time application development, and modern web development practices. Learners gain experience in building secure, scalable websites, handling server-side logic, and integrating databases. By the end of the program, students can confidently develop complete web applications and pursue careers in web and software development.

WHAT YOU WILL LEARN

JavaScript Fundamentals Core

- JavaScript concepts
- ES6 basics
- DOM manipulation
- Functions and event handling

AngularJS Basics

- Introduction to AngularJS architecture
- Modules and controllers
- Expressions and directives
- Two-way data binding

Advanced AngularJS Concepts

- Services and dependency injection
- Routing and SPA development
- Forms and validations
- Filters and custom directives

API Integration RESTful

- API integration
- HTTP services
- JSON data handling
- Authentication basics

Hands-On Projects

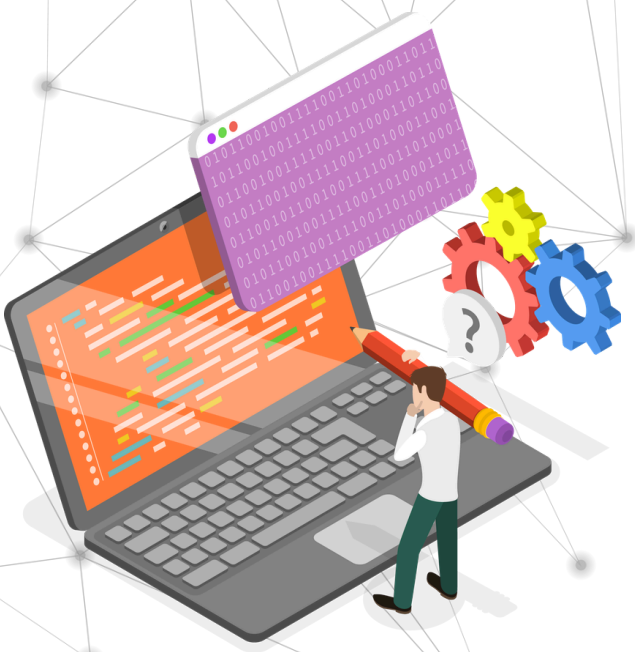

- Dynamic portfolio website
- To-do list web application
- E-commerce frontend application
- Admin dashboard project.

Visual Studio Code setup

- Git & GitHub for version control
- Debugging and testing tools
- Deployment basics.

Industry-Focused Training

- Live coding sessions
- Weekly assignments
- Code review sessions
- Mock interviews and assessments
